	 <p>Health for All</p> <p>Taiwan Can Help</p> <p>Technical cooperation</p>	<p>Cooperation and Training Framework. More than 200 experts from over 25 countries participated in this event, giving them the opportunity to discuss how technology can be used to contain the pandemic.</p> <p>6. On December 9, 2021, former Vice President Chen Chien-jen lectured at the 28th session of the Course on the Foreign Relations of the Republic of China (Taiwan) (which was conducted virtually in Spanish), sharing Taiwan's antipandemic knowledge with officials from 11 Latin American and Caribbean countries.</p>
		<ol style="list-style-type: none"> 1. Taiwan shared the Entry Quarantine System source code developed by its Ministry of Health and Welfare with Latin American and Caribbean countries. 2. Far Eastern Memorial Hospital provided ventilators and held a capability-building course online for Belizean healthcare professionals. 3. Taiwan's Ministry of Health and Welfare provided funds to Saint Lucia to establish a contact window on antipandemic measures. 4. The Taiwan Technical Missions in Belize, Saint Christopher and Nevis, Saint Vincent and the Grenadines, and

		<p>Guatemala helped these nations deepen their understanding of COVID-19 and bolster protective measures.</p> <p>5. Taipei Veterans General Hospital helped Saint Christopher and Nevis formulate and review the country's COVID-19 prevention and management guidelines and large-scale antipandemic action plan. The assistance, shared virtually, has enhanced the nation's epidemic prevention and containment strategies and capabilities.</p>
